### **QUESTION / COMMENT**

Re: The recent episode of a county commissioner beginning found guilty by a jury of a crime. 4. I request that the accountability and credibility of county government be enhanced, renewed and re-enforced by provisions in the County Charter whereby all government employees who do not meet standards of conduct expected of them be fired. That a breeched would result in immediate suspension and/or separation from that office. That speakers invited to the Charter Board be asked for their recommended changes to the HC Charter in this regard. I recommend action that would automatically suspend a commissioner when found guilty of a crime in a jury trail. This provision or stronger provisions in the Charter would effect a removal from office if a future commissioner is found guilty of a crime in court by a jury. And that the County Charter Review Board deal with who is responsible for the monetary costs of any employee that causes a liability to the citizens due to that employee's or elected officer's misconduct.
