

Limona Elementary School

Background

Limona Elementary School is located in Central Hillsborough County, on Telfair Road between Windhorst Road and Belladonna Drive. The location map shows the school location as well as the school boundary and the 2-mile radius for walking.

On September 19, 2002, a site visit was made to the school to observe current student walker patterns and conditions and to discuss sidewalk needs with the school principal. Currently, of the approximately 934 students attending the school, approximately 65 students walk or ride their bike.

There is one physical barrier that hinders students from walking to school. This barrier is Lakewood Drive to the west of the school. There are two crossing guards, one is located at the intersection of Windhorst Road and Telfair Road, and the other is located at the intersection of Windhorst Road and Highview Road.

Based on discussions with school officials, the current number of students walking could increase with the construction of new sidewalks. This determination is based on the locations of students' homes, parental attitudes and the general walking experience. These areas are highlighted on the project location map.
